

Opening of NotaBurgerJoint

Burger joint?

Recently, a small fast food joint has opened in southern part of Reno, and has become quite popular after opening up. But, many people question the new food joint for its name is quite opposite meaning of what their name is intended. I was able to interview a local who has been going there quite frequently, here is what they had to say about NotaBurgerJoint. I see this new food place and decided to go in and check it out. The name sorta threw me off at first, once I went in, did yah know what I saw? Burgers, and a sign inside that said Totally is a Burger Joint. I find this not amusing but then again they did serve good burgers so I am alright with this.

Amazing about NotaBurgerJoint?

NotaBurgerJoint recently has exceeded fast food places, making almost as a local McDonalds on a busy day. Their **burgers** alone are attracting customers to keep on coming back, though they offer other types of foods, but are mainly just burgers.
